

## **PRESENTATION ON USEFULNESS OF HOMOEOPATHIC THERAPY IN DISTRESS DURING CLIMATERIC YEARS**

A JC presentation was done by DR. Sadaf Shaikh PG-1 (dept. of REPERTORY) under the guidance of Lalitha.S.nadgir , M.D.(HOM).

The topic of JC was USEFULNESS OF HOMEOPATHIC THERAPY IN DISTRESS DURING CLIMATERIC YEARS.

The study was an observational study which suggested that homeopathic medicines are useful in the treatment of menopausal distress. The remedies such as lachesis, sepia, pulsatilla, sulphur, lycopodium, natrum-mur, causticum, and arsenic album were indicated and prescribed in the study.

But in the discussion it was discussed that medicines should be prescribed on the basis of constitution of the individual rather than on symptom similarity.

Further at the end of the session it was suggested that a randomized control trial may be carried out further to validate the results.
