**“A. M. SHAIKH HOMOEOPATHIC MEDICAL COLLEGE,
CONDUCTED A RESEARCH SENSITIZATION TRAINING ON HEALTH
RESEARCH IN HOMOEOPATHY,”**

A **Research Sensitization Programme** on the topic **“Health Research in Homoeopathy”** was successfully organized at **A. M. Shaikh Medical College** on **9th July 2026** in the **Repertory Lab** for the **BHMS Interns (2026–27 Batch)**. The session was conducted by **Dr. Rajashree R. Undale** with the primary objective of sensitizing interns to the fundamentals of health research, various types of research methodologies, ethical principles, and the growing importance of research in evidence-based homoeopathic practice. The interactive session provided valuable insights into how scientific research contributes to improving healthcare outcomes and strengthening clinical decision-making. Through engaging discussions and practical examples, the interns gained a clear understanding of the role of research in advancing the field of Homoeopathy and enhancing the quality of patient care.

The programme also emphasized the importance of maintaining high ethical standards in research, including informed consent, scientific integrity, confidentiality, and responsible conduct throughout the research process. Interns developed a deeper appreciation for systematic investigation and evidence generation as essential components of modern healthcare. The sensitization session inspired participants to adopt a research-oriented approach in their clinical practice and encouraged them to actively participate in academic research activities. By fostering curiosity, critical thinking, and ethical responsibility, the programme laid a strong foundation for developing competent healthcare professionals committed to lifelong learning, innovation, and evidence-based Homoeopathic practice.
